Editor’s Notes for Volume 7

Yoshimi Fukuhara*

The 7th volume of the Journal of Information and Systems in Education has been published under the editorial board which is listed on JSISE web site: http://www.jsise.org/e_journal/Editorialmember (Vol7).pdf. I deeply appreciate contribution of secretary members, editorial committee and reviewers who all got engaged in the editing this issue. The reviewing process of this issue has been worked out on the schedule with efforts of all of persons concerned.

The number of submitted papers for this issue is 22 (14 original papers, 5 practical papers, 2 short notes and 1 report on practice). In the results under the strict and prudent reviewing, 11 papers (4 original papers, 5 practical papers and 2 short note) were accepted. 3 of 11 accepted papers were changed the category of paper by refereeing, 2 practical papers were from original papers and 1 short note from original paper. The selection ratio is 50% (cf. 44% of vol.6, 58% of vol.5, 32% of vol.4 respectively). In addition, one invited paper was translated for this issue.

The principal keywords appeared in the accepted paper’s title are Video, Language Learning, Ubiquitous and so on. They describe the research trend from Experiment and Trial to Practice and Development.

The Call for Papers of the next volume 8th is already on the JSISE web-page as follows: http://www.jsise.org/e_journal/CFP-EJ-2009e.html.

We believe the research papers of four categories (original, practical, short note and report on practice) will make a great contribution from various aspects in the field of ICT utilization in education: Information and Communication Technology, i.e. “Information and Systems in Education” which is written in the name of our Journal. At last, the editorial board of Volume 7 deeply thanks again for every member and non-member contributors and readers.

* Editor-in-Chief of Editorial Committee
Editor's Notes for Volume 7 ............................................................. Yoshimi Fukuhara .................................................. 1

[Original Papers]
► Intelligent LMS with an Agent that Learns from Log Data ................................................................. Maomi Ueno ................................................................. 3
► “Error-Based Translation” as a New Approach in Learning Japanese Particles for Indonesians ................................................................. Saida Ulfa, Yasuhisa Okazaki, Yasuhiro Hieda, Toshihiro Hayashi, Kenji Watanabe and Shinichi Tadaki .................................................. 15
► Corpus-based Extraction of Modals for Learning English ................................................................. Robert Chartrand, Shunsuke Nakamoto, Hidenobu Kunichika and Akira Takeuchi .................................................. 26
► Design and Evaluation of Videoconference Support System Presenting Multimedia Information Related to Printed and Handwritten Keywords ................................................................. Kikuo Asai, Hideaki KOBAYASHI and Kimio Kondo .................................................. 36

[Practical Papers]
► Video Conferencing between a University in Japan and a University in China and Its Effects on the Promotion of Students' Research Using Their Respective Mother Tongue ................................................................. Isao Miyaji and Zairong Li .................................................. 49
► Using an LMS for Foreign Language Teaching/Learning: An Attempt Based on the “Cyclic Model of Learning” ................................................................. Seijiro Sumi and Osamu Takeuchi .................................................. 59
► Analyzing the Motivation Factors of Students in the Art and Design Faculty to Learn Programming ................................................................. Hidekuni Tsukamoto, Hideo Nagumo, Yasuhiro TakeMura, Kuol-H Li Huang and Ken-ichi Matsumoto .................................................. 67
► Applying a 3-tiered Blogging System to Support Learning in a Distance Course ................................................................. Wei-Jane Lin, Hsiu-Ping Yueh, Masayuki Murakami and Michihiko Minoh .................................................. 76
► A Video Knowledge Contents Creation System for Enhancing On-site Handiwork Skill Acquisition ................................................................. Naofumi Otani, Kazuyasu Fukui, Yutaka Sakane and Yoichi Takebayashi .................................................. 86

[Short Notes]
► Adaptive Content Delivery System for Ubiquitous Learning ................................................................. Xinyou Zhao, Toshie Ninomiya, Mikko Vilenius, Fumihiro Anma and Toshiro Okamoto .................................................. 95
► Student Authentication Function for Preventing Unfair Attendance by Identity Transfer in the Ubiquitous Classroom ................................................................. Hirokuki MitsuHara, Naofumi ise, Kazuhide Kanenishi and Yoneo Yano .................................................. 103

[Translation of Awarded Paper]
► Overview of Graduate School of Science and Technology on the Internet, Shinshu University and Its Evaluation ................................................................. Hisayoshi Kunimune, Masaaki Nimura, Katsumi Wasaki, Yasushi Fuwa, Yasunari Shidama and Yatsuka Nakamura .................................................. 112
